PeopleSoft Services

- **Implementation Services** including assessment studies, planning, and execution using ObjectWin's own implementation methodology.
- **Post-Implementation Services** covering maintenance and support for existing PeopleSoft HCM and Finance solutions. It also involves interface development, supporting third party and legacy system, and data migration.
- **Upgrade Services** between versions 8.x to 9.0.
- **Integration Services** between various legacy systems and PeopleSoft. We also develop interfaces between PeopleSoft and other ERP applications. As a part of our competency set-up process, ObjectWin has recruited a skilled team of consultants that includes functional specialists, technical specialists and DBAs.
- **Customized Training Programs** in core areas of HCM and Finance, and PeopleSoft Technical.
- **Bolt-on Application Development Services** for additional functions such as recruitment system interfaces, project management system, and attendance monitoring system.
- **Testing Services** including functional testing, regression testing and load testing using standard testing tools.

PeopleSoft Implementation Service

Whether you are implementing a new system, adding modules or needing assistance to enhance the benefits of your existing PeopleSoft implementation, we can implement the best solutions quickly and effectively. ObjectWin provides skilled and experienced services across the entire PeopleSoft product spectrum.

PeopleSoft Upgrade Service

ObjectWin PeopleSoft upgrade services help clients make back-office operations more effective, reduce the total cost of owning an Enterprise Resource Planning (ERP) solution, simplify access and streamline operations of enterprise portals. ObjectWin provides upgrades to PeopleSoft 8.x and 9.0. We assist customers at every step of the upgrade process, from strategy formulation to employee training. Our upgrade services roadmap provides a fully scalable solution that allows organizations to use the services they need in a plug and play mode. It also helps accelerate the transfer of business knowledge to the technical and functional teams.

Upgrade Major Deliverables

The PeopleSoft Upgrade project will require dedicated customer involvement as the team produces, reviews, and approves the following major deliverables:

- Functional upgrade workshop and plan
- Technical upgrade workshop and plan
- Process design document
- Training and change management plan
- Upgraded database
- Test script and results
- Tested and approved PeopleSoft environment

Our Strengths

- Client advisory services to help define the client's best strategy for gaining value from their PeopleSoft applications
- Implementation services for new PeopleSoft customers
- Module extensions for current clients seeking to customize or enhance their existing solutions
- Upgrade services for clients that are extending the return on their initial PeopleSoft investment and enjoying the value of the application's unlimited offerings
- Module additions for clients that are looking to improve business processes and efficiencies with the implementation of previously acquired modules
- Support services for delivering cost-effective maintenance, operational support and help desk service to our client's internal customer training
- Increase and guarantee service levels to business users

Strategic Managed Services

All of ObjectWin's services provide support for production environments and can be extended to cover development and other pre-production environments. ObjectWin provides a quality solution to all of your application support needs.

Utilizing best of the breed processes and procedures and state of the art technologies, ObjectWin is able to meet all of your database and application needs, whether you need full support for all of your environments or you just need to augment your existing staff. ObjectWin provides an entire team to develop an enterprise-wide solution or offer critical value in the assessment, engagement and delivery of your technology endeavors.
