

SharePoint Deployment Planning Services (SDPS)

Maximize your Software Investment in SharePoint by using ObjectWin's SDPS that allows you to use your Microsoft Software Assurance for Volume Licensing benefits for effective deployment of SharePoint.

As part of your Microsoft volume licensing agreement, you own a set number of Pre-Paid consulting days through your software assurance benefit to support your SharePoint Deployment planning needs. ObjectWin Technology, an SDPS partner and Microsoft Gold Certified Partner, is uniquely positioned to support your organization with the SDPS program. Depending on your software assurance benefits, your organization is entitled to a 1, 3, 5, 10 or 15-day SDPS engagement.

SDPS Offerings

Benefits

- An engagement that is customized to your needs (collaboration, portals, search or enterprise management)
- Utilize the benefits that your organization has already purchased as part of software assurance
- ObjectWin can share best practices and analyze your organizational environment
- Provide your organization with tools and services that help with your SharePoint deployment
- Reduce the amount of conflicts your organization will experience during an initial company-wide deployment
- Increase user productivity, lower total cost of ownership, and improve return on software investment

ObjectWin's Offerings

- Discovery Session
- Strategy Briefing Session
- Architectural Briefing Session
- Design Solutions
- Proof of Concept
- Customized Capability Planning
- Deployment Roadmap Planning
- Hands-on Workshop
- Knowledge Transfer

Deployment Planning- SharePoint 2010 Engagement Day Details

One Day - Includes a Strategy Briefing Session (SBS) and an overview of SharePoint features and solution areas, plus a review of your environment, pain points and requirements. Together, we will design a high-level solution based on your business needs and further gain knowledge on how best to deploy SharePoint in your environment.

Three Days - Includes an Architecture Design Session (ADS), participants dive deeper into their requirements and design a SharePoint solution tailored to their environment. Conceptual design, logical and physical architectures are created for the solution (in addition to the Strategy Briefing Session).

Five Days - Designed to provide deep guidance on specific SharePoint solution capabilities that provide value within your environment. Includes a virtual lab session for hands-on understanding of the solution technologies and capabilities, 2 days of deployment planning and assistance with creating a plan and best practices for deployment (in addition to the Strategy Briefing and Architecture Design Session)

Ten & Fifteen Days - Both the 10 and 15 day engagement includes a 3-day ADS to understand your scenarios and introduce technologies, solutions, and concepts; plus 2 days of deployment planning for a specific SharePoint capability. This is followed by a 5 or 10-day Proof of Concept (POC) project to demonstrate the solution at a customer environment (in addition to the Strategy Briefing Session)

Notes:

- Engagements build on the previous ones, in terms of activities and complexity of deliverables. For example, a 3-Day engagement will include a Strategic Briefing and adds an Architectural Design Session.
- Length of SDPS engagement is determined by amount of Software Assurance purchased and Packaged Service days that customer has allotted to SDPS.

Upgrade Planning- SharePoint 2010 Engagement Day Details

One Day - Includes a Strategy Briefing Session to introduce SharePoint 2010 and discuss the immediate and future value of moving to 2010.

Three Days - Includes an Architecture Design Session to document the current 2007 deployment end to end, discuss upgrade options and flag areas of potential concern (in addition to the Strategy Briefing Session).

Five Days - Includes an Upgrade Plan to provide formal documentation of the upgrade based on data collected (in addition to the Strategy Briefing and Architecture Design Session).

Ten & Fifteen Days - Both the 10 and 15 day engagements could include a Pre-Upgrade Checker that utilizes the pre-upgrade checker tool to assess upgrade readiness and provide a formal analysis of the results along with recommendations for problem resolution (in addition to the Strategy Briefing, Architecture Design Session, and Upgrade Plan).

How to Get Started With SDPS Engagement

In order to procure SDPS from ObjectWin, please submit your SDPS voucher provided by Microsoft. As soon as your voucher is submitted, an ObjectWin account manager will work with you to schedule an SDPS engagement*.
